Summary

Motivated B.Tech graduate with hands-on experience in Web Development, Data Analysis, and Cybersecurity. Possess strong programming skills, database management expertise, and the ability to build secure and efficient applications. Passionate about solving real-world problems and contributing to innovative projects in fast-paced environments.

Skills

Data Structures and Algorithms
Languages: C, C++, Java, HTML, CSS, JavaScript, XML
Scripting: Python
Databases: MySQL
Frameworks & Libraries: React.js, Node.js
Tools: Eclipse, IntelliJ IDEA,Visual Studio Code, Git
Technologies: Cybersecurity, Internet of Things (IoT), Machine Learning, Web Development
Operating Systems: macOS, Windows, Ubuntu
Software Packages: Microsoft Office

Experience

Business Data Management Associate **August 2025 – June 2026**
Family Business, Bulandshahr

- Maintained and organized monthly records of investments, sales, expenses, and profits.
- Tracked and updated business data to monitor monthly revenue, costs, and profitability.
- Analyzed financial records to compare monthly business performance and support decision-making.

Analytics Insights Launchpad Program Trainee **February 2024 – June 2024**
PwC (Remote)

- Gained hands-on experience in data science, including data wrangling, and predictive modeling.
- Built proficiency in Python programming for data manipulation, visualization, and basic automation tasks.
- Worked with Oracle RDBMS to perform SQL queries, manage datasets, and support data retrieval for analytics tasks.

Projects

Spotify Clone **March 2025 – December 2025**

- Developed a responsive music streaming web application using React.js, JavaScript, and Firebase with secure OTP-based authentication and session management.
- Optimized API calls and implemented caching to improve song load performance by 30%.
- Built reusable React components and integrated real-time Firebase database for dynamic playlists and seamless cross-device interaction.

Air Pollution AQI Prediction System **October 2023 – January 2024**

- Created a machine learning-based system to predict Air Quality Index (AQI) categories using CPCB standards.
- Performed data cleaning, exploratory data analysis, and AQI calculation from pollutant concentrations.
- Trained and compared multiple classification models including Random Forest, Logistic Regression, KNN, and Decision Tree.

Education

Master of Business Administration(MBA) - Online **2026 – Present**
Jaypee Institute of Information Technology, Noida

B.Tech Computer Science and Engineering **Graduated: 2025**
Graphic Era University, Dehradun *CGPA: 8.60 / 10*
